NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY EXAMINATION REPORT
(PCT Rule 71.1)

Date of mailing
(day/month/year)

28.07.2005

Applicant's or agent's file reference
P209264PCT DBO/jdo

IMPORTANT NOTIFICATION

International application No.
PCT/NL 03/00445

International filing date (day/month/year)
18.06.2003

Priority date (day/month/year)
18.06.2003

Applicant
N.V. NUTRICIA et al.

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. **PCT/NL 03/00445**

I. Basis of the report

1. With regard to the elements of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).*)

Description, Pages

1-22 as originally filed

Claims, Numbers

1-16 received on 16.06.2005 with letter of 16.06.2005

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. **PCT/NL 03/00445**

**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

1. Statement

Novelty (N)	Yes: Claims	1-16
	No: Claims	
Inventive step (IS)	Yes: Claims	3, 10-14
	No: Claims	1-2, 4-9, 15, 16
Industrial applicability (IA)	Yes: Claims	1-16
	No: Claims	

2. Citations and explanations

see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/NL 03/00445

Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

Reference is made to the following documents:

D1: US-A-4414198
D2: US-B1-6290997
D3: US-A-5476675
D4: US-A-1945963
D5: FR-A-2733420
D6: EP-A-0455475

1 Novelty - Article 33(1) and (2) PCT

The subject-matter of independent claims 1, 12, 13 and 15 is novel as the subject-matter of said claims is not disclosed in any of the prior art documents.
Claims 2-11, 14 and 16 are dependent on claims 1, 12, 13 and 15 and as such also meet the requirements of the PCT with respect to novelty.

2 Inventive step - Article 33(1) and (3) PCT

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1 and 15 does not involve an inventive step in the sense of Article 33(3) PCT.

D4 teaches about improved pectin preparations capable of being readily and rapidly dispersed in aqueous media without the formation of lumps or undesirable frothing. Warm or hot aqueous media are preferably employed since they give more satisfactory results.

Adding oligosaccharides to increase the SCFA content is a straightforward possibility that will be done where the circumstances make it desirable.

Thus, the subject-matter of independent claims 1 and 15 is obvious for the skilled person.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/NL 03/00445

Combining pectin, oligosaccharides and calcium in order to increase the bioavailability of the calcium in the fiber product is not derivable from the available prior art documents.

Therefore, the subject-matter of claims 3, 10-12, 13 and 14 is considered to involve an inventive step.

3 The following observations are also made:

3.1 Contrary to the requirements of Rule 5.1(a)(II) PCT, the relevant background art disclosed in the documents D1-D4, D6 is not mentioned in the description, nor are these documents identified therein.

3.2 There is a typing error in claim 14; said claim should be dependent on claim 13.

EPO - DG 1

16. 06. 2005

CLAIMS

(76)

1. A process for preparing a hot liquid fiber product for enteral administration, comprising admixing:
 - 5 a. a serving of a reconstitutable composition comprising
 - (i) between 0.1 gram and 75 grams fibre-pectin; and
 - (ii) indigestible oligosaccharide with a degree of polymerization exceeding 2 and below 60 monose units; and
 - (iii) an effervescent system;
 - 10 and
 - b. a liquid with a temperature that exceeds 35°C
2. The process according to claim 1, wherein the indigestible oligosaccharide is selected from the group consisting of fructans, fructooligosaccharides, indigestible
15 dextrins galactooligosaccharides (including transgalactooligosaccharides),
xylooligosaccharides, soybean oligosaccharides, arabinooligosaccharides,
glucooligosaccharides, mannoooligosaccharides, fucooligosaccharides and mixtures
thereof. The process according to claim 1, wherein the fiber has an average
20 molecular weight of at least 400 Da, preferably at least 5000 Da.
3. The process according to claim 1 or 2, wherein the reconstitutable composition further comprises a calcium salt.
4. The process according any one of the preceding claims, wherein the liquid has a
25 volume of between 50 and 1000 ml.
5. The process according to any one of the preceding claims, wherein the fiber is ~~selected from the group consisting of low-methoxylated pectin and alginate.~~
- 30 6. The process according to any one of the preceding claims, wherein the effervescent system contains at least one base that liberates carbon dioxide selected from the group consisting of sodium carbonate, potassium carbonate, sodium bicarbonate,

potassium bicarbonate, calcium bicarbonates, ammonium bicarbonate and sodium glycine carbonate.

7. The process according to claim 6, further comprising an acidic ingredient selected from the group consisting of as citric, tartaric, adipic, fumaric, malic, lactic, acetic, maleic and benzoic acids, and phosphates.
8. The process according to any one of the preceding claims, wherein the reconstitutable composition further comprises NaCl and/or glutamate.
9. The process according to any one of the preceding claims, wherein the resulting liquid fiber product has a pH above 4.
10. The process according to any one of the preceding claims, wherein the reconstitutable composition contains a calcium salt with a solubility below 0.15 g per 100 ml water at 20°C and pH 7 which provides more than 0.05 gram dissolved calcium per 100 ml water at a pH below 4 and a temperature of 37°C, and the resulting liquid product (i) has a viscosity below about 100 mPas, and (ii) exhibits a viscosity above about 250 mPas when it is acidified to pH 3.
11. A hot liquid fiber product with a viscosity below 100 mPas, a pH that exceeds 4 and a temperature of at least 35°C, prepared with the process according to claim 10.
12. A hot liquid fiber product with a viscosity below 100 mPas, a temperature of at least 35°C and a viscosity of at least 250 mPas when it is acidified to pH 3, said composition comprising (i) a calcium salt with a solubility below 0.15 g per 100 ml water at 20°C and pH 7 which provides more than 0.05 gram dissolved calcium per 100 ml water at a pH below 4 and a temperature of 37°C, (ii) per serving between 0.1 gram and 75 grams fiber, (iii) indigestible oligosaccharide with a degree of polymerization exceeding 2 and below 60 monose units.
13. Use of fiber in the manufacture of composition for use in a method for the treatment and/or prevention of a diet responsive condition in a monogastric mammal, said

3

method comprising enterally administering to the mammal the composition of claim 11 or 12.

14. Use according to claim 14, wherein the diet responsive condition is overweight.

15. A packaged reconstitutable composition which bears instructions to mix one or more servings of the reconstitutable composition with a liquid having a temperature above 35°C, said composition comprising per serving:

- (i) between 0.1 gram and 75 grams pectin fiber;
- (ii) indigestible oligosaccharide with a degree of polymerization, exceeding 2 and below 60 monose units; and
- (iii) an effervescent system

16. The packaged composition according to claim 15, wherein the composition comprises per serving:

- (i) between 0.5 and 15 g low methoxylated pectin and/or alginate;
- (ii) between 0.01 and 25 grams base that liberates carbon dioxide, preferably selected from the group consisting of sodium carbonate, potassium carbonate, calcium carbonate, sodium bicarbonate, potassium bicarbonate, calcium bicarbonates, ammonium bicarbonate and sodium glycine carbonate;
- (iii) between 0.025 and 5 grams acidic ingredient, preferably selected from the group consisting of citric, tartaric, adipic, fumaric, malic acids, lactic, acetic, malic and benzoic acids; and phosphates and
- (iv) between 0.05 and 5 grams calcium.

~~17. The composition according to claim 15 or 16, further comprising indigestible oligosaccharide.~~
